PROTEKTOR SA

Analytical Report

A long way to implement the new strategy

Protektor has greatly aroused the investors expectations with both very good results for Q4 2020 and Q1 2021, as well as the strategy for 2020-2023 Man and his safety, in which it assumes focusing on product development and focusing on improving organizational effectiveness. The new, fully competitive products on the dynamically developing market of protective clothing were to ensure the Company's revenue growth and improved profitability. The results for the third quarter show that Protector still has a long way to go to achieve these goals, and revenues and gross margin remain at the same level as in the previous year (+ 3.5%, + 0.02% y / y). In addition, the weak sentiment towards the construction industry, which has persisted on the Warsaw Stock Exchange since September, also affected related companies. Despite the fact that Protektor results are slightly worse than our forecasts, we do not change our positive attitude towards the Company and keep the valuation unchanged at PLN 4.6, which is a premium to the current market price (PLN 3.17) at 45%.

Growth factors

Industry recovery after the pandemic
Increase in public orders
New areas of activity
Reorganization of processes and production

Risk factors

Exchange rate fluctuations
Incomplete use of the machinery park
Market downturn
Rising salaries

Basic definitions

CAPEX (capital expenditures) - investment expenditures on product development, system implementation (including intangible assets) or tangibles assets in the part in which the capital is intended to maintain the company's current ability to generate income.

DCF (discounted cash flows) - discounted cash flows; all future cash flows are estimated and discounted in order to determine their present value. The value of the discount rate used corresponds to the cost of capital and includes an assessment of the risk related to future cash flows.

DFCF - Discounted FCF (Free Cash Flows to Firm).

EBIT (earnings before interest and taxes) - operating income i.e. the income before deduction of taxes and interest.

EBITDA (earnings before interest, taxes, depreciation and amortization) - the company's operating profit before deducting interest on interest-bearing liabilities (loans, bonds), taxes, amortization and depreciation of tangible and intangible assets; here EBITDA = operating income + amortization of tangible fixed assets + depreciation of intangible assets.

EV (Enterprise Value) - total enterprise value; here EV = current stock market capitalization + net debt.

EV / EBITDA - the ratio is calculated by dividing the present value of the enterprise (EV) by the value of EBITDA.

FCFF (Free Cash Flow to Firm) - free cash flows for owners of equity capital and creditors, which can be defined as flows resulting from the company's operating and investment activities, after all financial expectations of capital donors, i.e. all parties financing the company, have been settled .

WSE – Warsaw Stock Exchange.

NOPLAT - net operating result less adjusted taxes; here NOPLAT = EBIT * (1 - tax rate).

P / BV (price / book value) - the ratio is calculated by dividing the current capitalization of a listed company by the book value of its equity, which is provided in the company's balance sheet.

P / E (price earnings ratio) - stock exchange ratio. It is calculated by dividing the market price of one share by the net profit per share.

PV TV - Present Value, ie the residual value (TV) discounted at the present moment.

CR - current report.

SB - Supervisory Board.

TV (Terminal Value) - residual value; enterprise value after the forecast period; here estimated with the help of the Gordon model.

WACC - weighted average cost of capital; financial indicator informing about the average relative cost of capital engaged in financing the enterprise.
